You are not fully protected from COVID-19 until two weeks after your last shot!

- If you got the two-shot vaccine, you must wait 2 weeks after your second shot.
- If you got the vaccine that only needs one shot, you must wait 2 weeks after your shot.

**STAY SAFE AFTER BEING VACCINATED**
Experts don’t know how long the vaccine will protect you from COVID-19 or if you can still spread COVID-19 to others after being vaccinated. Even after getting the vaccine, continue to:

- Wear a mask.
- Practice social distancing.
- Avoid gatherings with many people.
- Wash your hands frequently.
- Disinfect high-touch areas.

Even if you are fully vaccinated, get tested for COVID-19 right away if:

You have been around someone with COVID-19 and start to feel ill. Also stay home and away from others.

You live with many people and have been around someone with COVID-19. Even if you do not feel ill, get tested. Also stay home and away from others.
TWO WEEKS AFTER YOU HAVE BEEN FULLY VACCINATED, YOU CAN:

- Be indoors with others who have been fully vaccinated without wearing a mask.
- Be indoors with others from one other home who have not been vaccinated without wearing a mask.

However, you should avoid visiting people who are at a high risk of getting seriously ill from COVID-19 to protect them. If you must visit them, you should still try to protect them by wearing a mask, staying 6 feet away and washing your hands.

People may be at high-risk if they:
- Have other illnesses like cancer, diabetes or high blood pressure
- Are very overweight
- Smoke
- Are pregnant
- Are over age 65

BE SAFE WHILE TRAVELING

When you travel, protect yourself and others by:
- Wearing a mask over your nose and mouth when in public.
- Avoiding crowds and stay at least 6 feet/2 meters from anyone you did not travel with.
- Washing your hands often.

BE SAFE WHILE TRAVELING IN THE UNITED STATES

- You do not need to get tested before you travel.
- When you return, you do not need to get tested or stay away from others unless you feel ill.

BE SAFE WHEN TRAVELING INTERNATIONALLY

- Check with your airline and local health officials where you are going to see if you need to get tested or stay away from others before your trip.
- Get tested no more than 3 days before you come back to the U.S.
- After your trip:
  - Get tested within 3-5 days.
  - Stay home and away from others if you feel ill.
  - Check with local health officials to see if there is anything else you need to do.

WE’RE STILL LEARNING

- How long vaccines protect people from getting COVID-19.
- Whether vaccines keep people from spreading the disease.
- How effective vaccines protect against new types of COVID-19.
