Vaccines provide the most protection

• Getting vaccinated is the most important step for you to take to protect yourself and your community.

• After getting fully vaccinated it is unlikely you will get sick from COVID-19, and even if you do, the vaccine will protect you from getting dangerously ill.

Even vaccinated people are safest with a mask

It is uncommon for people to get sick with COVID-19 after they are vaccinated, but it can happen.

Getting a vaccine and wearing a mask are the best ways to avoid getting sick and spreading COVID-19 to others.
