COVID-19 VACCINE

GET THE FACTS. WEARING A MASK

IT IS ALWAYS SAFEST TO WEAR A MASK

COVID-19 is still infecting thousands of people every day including elderly, adults, teens and children. **Regardless** of whether masks are required in your area, you and your family will be safest if you wear a mask.

Masks protect against COVID-19

Because COVID-19 spreads very easily, wearing a mask protects you, your friends and family, and your community.

- When you wear a mask, it is less likely that you will get sick from breathing in the virus if it is in the air.
- It is possible to be sick with COVID-19 and not know it, because not everyone feels sick. In this case, wearing a mask makes it less likely that you will spread the virus to others.

MASKS MUST BE WORN PROPERLY TO BE EFFECTIVE.

- Wear your mask over your nose and mouth
- Make sure no air leaks out the top or sides
- Put your mask on and off with clean hands
- Do not touch your mask when it is on your face
- Clean your reusable mask at least daily
- Use your disposable mask
 only once

Vaccines provide the most protection

- Getting vaccinated is the most important step for you to take to protect yourself and your community.
- After getting fully vaccinated it is unlikely you will get sick from COVID-19, and even if you do, the vaccine will protect you from getting dangerously ill.

EVEN VACCINATED PEOPLE ARE SAFEST WITH A MASK

It is uncommon for people to get sick with COVID-19 after they are vaccinated, but it can happen.

Getting a vaccine and wearing a mask are the best ways to avoid getting sick and spreading COVID-19 to others.
