It takes two weeks after your last shot to get all the protection the vaccines offer.

In order to stay protected from COVID-19, it is important to stay up-to-date on your COVID-19 vaccines, including getting booster shots when you are eligible.

**STAY SAFE AFTER BEING VACCINATED**

Even after getting the vaccine, continue to:

- Wear a mask.
- Practice social distancing.
- Avoid gatherings with many people.
- Wash your hands frequently.
- Disinfect high-touch areas.

Even if you are fully vaccinated, get tested for COVID-19 right away if:

- You have been around **someone with COVID-19 and start to feel ill**. Also stay home and away from others.
- You **live with many people** and have been **around someone with COVID-19**. Even if you **do not feel ill**, get tested. Also stay home and away from others.
