

NRC-RIM

National Resource Center for
Refugees, Immigrants, and Migrants

The National Resource Center for Refugees, Immigrants and Migrants is funded by the CDC and housed at the University of Minnesota. Our Afghan health portfolio supports health departments and community-based organizations working with Afghan newcomer communities to promote health equity.

By partnering with national organizations like IRC and NACCHO, NRC-RIM elevates the work of organizations partnering with communities and offers resources that build the capacity of organizations serving Afghans.

Capacity-Building Toolkits

Afghan Health Toolkits equip organizations with the tools to plan and implement public health interventions in Afghan newcomer communities across the U.S. Covering a number of topics, these toolkits set service providers at local health departments and community organizations up for success.
